

Build your CSIRT

Excellium proposes a two-day lectures training named «Build your CSIRT». It will enable you to understand the needs and the global scope of what is a Computer Security Incident and Response Team (CSIRT). What are the roles in both prevention and incident responses and what will be the required skills and the conduct to have in case of various incidents.

The student will have two-day lectures, which should enable him to understand the required skills, processes and needs in order to build his own CSIRT in order to create his own CSIRT Team.
