

DASA DevOps Coach

Like all other hyper-growth trends in the IT industry, the adoption of DevOps is not immune to potential misunderstandings and misconceptions. Besides relevant tooling and technology, DevOps predominantly entails a cultural shift towards a new mindset, behaviors, a new organization, and a new way of working.

DASA DevOps Coaches within organizations make remarkable contributions on the ground in developing team members and teams into high performing teams with a new mindset, behaviors, organization, and a way of working. The objective of the Coach is to help teams develop their DevOps skills, knowledge and behavior in order to rapidly become self-sufficient and fully leverage the benefits of DevOps.

Coaches promote and facilitate teams that make them more competent and fulfilled so that they are proficient to contribute to their organization and finding meaning of DevOps adoption . As a coach, you help to speed up delivery in teams, create more transparency and build a continuous improvement mindset. At the Organization level, you provide strategic coaching and help organizations achieve their transformational goals.

The DASA DevOps Coach program is designed to prepare professionals for working as an effective DevOps Coach. During this intense, activity-based course you become familiar with the characteristics and traits of a successful DevOps Coach, learn about DASA's coaching model and apply the DASA DevOps Competence Model in teams and organizations.
