Manage tests in Jira
Test Management tool

Transform and Customize Jira Software into a professional Test Management tool or implement one of the most recognized Atlassian extensions for managing test activities like Xray or Zéphyr (TM4J) for Jira.

Namely, Jira has had strong growth in terms of evolution and flexibility, and now it can be used for test management. This tool can offer you a zero-cost solution, by configuring its native components (issue types and workflows) to meet your testing needs or by using one of the dozens of apps/add-ons available on the Atlassian marketplace.

These 2-day training will allow you to get an idea of the different solutions that are available to you for managing tests with JIRA.
On the first day, you will learn how JIRA can be customized to meet your test management and test report needs.
On the second day, you will discover the best test management applications such as Zéphyr (TM4J) and Xray.

Détails

- Code : JIRA
- Durée : 2 jours (14 heures)

Public

- Analysts
- Project managers
- Quality Assurance
- Testers
