

SC-400T00A Microsoft Information Protection Administrator

The Microsoft information protection administrator plans and implements controls that meet organizational information protection and governance requirements by using Microsoft 365 information protection services. The course covers an end-to-end look at each of the security tools, how to deploy and configure them, and what scenarios they are primarily used for. The information protection administrator defines applicable requirements and evaluates IT processes and operations against those policies and controls. They are responsible for creating policies and rules for content classification, data loss prevention, governance, and protection.

Détails

- **Code** : SC-400T00A
- **Durée** : 4 jours (28 heures)
